### DETAILED ACTION

The cancellation of claims 2-4 and 6-16 are acknowledged.

#### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 5,773,101 to Sanders.
3. Sanders teaches various images of nature including plants may be photographed and transferred to a sheet producing a camouflage pattern useful in hunting wildlife and animals (col. 7, lines 1-20).
4. While Sanders does not explicitly state the type of animal image such as an insect, flying insect, moth or butterfly commingled as per instant claims 1 and 5, however, it would have been obvious to one having ordinary skill in the art to have included animals such as an insect or moth because moths, insects, and animals naturally exist in nature (commingled) and Sanders teaches various images of nature may be photographed and transferred to a sheet producing a camouflage pattern useful in hunting wildlife and animals (col. 7, lines 1-20).

***Response to Arguments***

5. Applicant's arguments filed 09-11-06 have been fully considered but they are not persuasive.

Applicant argues that while Sanders teaches images in nature, Sanders does not teach images of an animal, flying insects and other images as recited or in the pattern, however, these are obvious design choices that effect the camouflage patterning dependent upon the surrounding environment. For example, if one wants to blend in with the nature containing butterflies and animals, one having skill in the art would choose a butterfly print to blend in with the environment to make it easier to capture the butterfly or whatever one desires. Sanders teaches the patterns naturally supplied by nature may be taken with a photograph, where such moths, insects and butterflies exist, which is the same method Applicant uses as found on page 11, last paragraph of the instant specification.

The test for obviousness is what the combined teachings of the prior art references would have suggested to those of ordinary skill in the art. *In re Young*, 927 F.2d 588, 591, 18 USPQ2d 1089, 1091 (Fed. Cir. 1991); *In re Keller*, 642 F.2d 413, 425, 208 USPQ 871, 881 (CCPA 1981). This test requires us to take into account not only the specific teachings of the prior art references, but also any inferences which one skilled in the art would reasonably be expected to draw therefrom. *In re Preda*, 401 F.2d 825, 826, 159 USPQ 342, 344 (CCPA 1968).

The Sanders reference provides some teaching, suggestion, or motivation found either explicitly or implicitly in the references themselves and in the knowledge generally available to one of ordinary skill in the art. Thus, a *prima facie* case has been established, and therefore the

Art Unit: 1774

burden shifts to the Applicant to submit additional objective evidence of nonobviousness, such as comparative test data showing that the claimed invention possesses improved properties not expected by the prior art. Arguments of counsel cannot take the place of factually supported objective evidence. See, e.g., *In re Huang*, 100 F.3d 135,139-40, 40 USPQ2d 1685, 1689 (Fed. Cir. 1996); *In re De Blauwe*, 736 F.2d 699,705, 222 USPQ 191, 196 (Fed. Cir. 1984). Until the Applicant has convincingly argued or has provided evidence to the contrary, the rejections are maintained.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
